

TAC Advisory announces partnership with DCIM provider GreenField Software
Strengthens TAC's commitment to deliver complete Data Centre solutions in ASEAN

Singapore: November 15, 2016

TAC Advisory, a leading Data Centre Consulting company headquartered in Singapore doing business across the ASEAN region, announced partnership with India-based DCIM provider, GreenField Software.

TAC Advisory offers consulting services to enterprise and colocation data centres as well as managed services providers in all aspects of IT and critical infrastructure management.

GreenField Software provides GFS Crane Data Centre Infrastructure Management (DCIM) software that helps enterprise and colocation data centre customers control capital costs, reduce operating expenses, and mitigate risks of failures.

Through this partnership, TAC Advisory will be authorised to deploy [GFS Crane DCIM](#) during its consulting engagements with customers. The real-time measurements and analytic reports of power and environmental conditions from GFS Crane DCIM, would enable TAC Advisory team to deliver recommendations on high availability, power, cooling and space optimizations to data centre owners and operators.

Commenting on this alliance, Shekhar Dasgupta, Founder and Director of [GreenField Software](#) said, "We are delighted to partner with TAC Advisory. I am confident our association would provide significant value to TAC Advisory's Data Centre customers looking to improve operational efficiencies, reduce energy costs, mitigate risks and becoming a greener data centre."

"We look forward to a long-term relationship with GreenField Software, and are pleased to have them on board as a TAC Advisory partner," said Mr Dave Ng, Founder and CEO of TAC Advisory Services. "The partnership between TAC Advisory and GreenField Software is geared towards providing complete data centre solution, combined with expert knowledge and consulting services."

About TAC Advisory Solutions:

TAC Advisory is headquartered in Singapore but works across the ASEAN Region through business associates. TAC Advisory Services Pte Ltd had been focusing on driving transparency, accountability, continuity and energy efficiencies in critical facilities and data centre infrastructure and operations with the implementation of DCIM and DCSM. Mr. Dave Ng is the Principal Advisor of TAC Advisory Services Pte Ltd. He had over 30 years of knowledge and experiences spanning both the IT and data centre industries. He was the Director of the Uptime Institute Network-Asia Pacific and Technical Director of Uptime Institute, Professional Services. Prior to joining Uptime Institute, Dave Ng was the CEO of Keppel Digihub for over 10 years, and had delivered on profitability and zero downtime for its datacenter operations during his tenure.

About GreenField Software:

GreenField Software, an India-based Intelligent Infrastructure Management Solutions company, provides a complete DCIM for both enterprise and colocation data centres. Customers installations are in diverse business segments such as higher education, Financial Services, Government, Hi-Tech, Media, Manufacturing, Power Utilities and Telecom.

GFS Crane DCIM helps customers control capital expenditure, reduce operating costs and mitigate risks of data centre failures.
